

Summit SS USH: United States History

Summit fully illustrated textbook edition

Original Summit-authored instructional text generated from the live course runtime, bibliography layer, and assessment structure.

March 22, 2026

@@TOKEN_0@@ Summit first edition draft @@TOKEN_1@@ high-school @@TOKEN_2@@ 1
@@TOKEN_3@@ 14 weeks @@TOKEN_4@@ 6-7 hours each week

Originality note

This textbook is a Summit-authored instructional text. It is informed by the course bibliography in @@TOKEN_0@@ and by open academic references used elsewhere in Summit, but it does not copy or restate any single commercial textbook.

How this textbook was built

This book was generated from the live Summit course runtime for United States History: the syllabus, lesson sequence, reading chapters, guided practice, homework sets, quizzes, mastery exam, and workload standard. The design goal is to give a student a usable, course-complete book while preserving original Summit wording and sequencing.

United States development, reform, conflict, institutions, and evidence-based historical argument.

World-studies chapters should combine chronology, place, evidence, and interpretation instead of reducing the subject to isolated facts.

This volume is structured as a teaching book rather than a bare note pack. Every chapter contains explanation, worked examples, guided practice, chapter homework, and a rear answer key so the student can study independently and still get disciplined feedback.

Course use guide

- Read one chapter at a time in sequence; each chapter is aligned to a live lesson block in the course workspace.
- Rebuild the worked examples before attempting the graded homework or quiz material.
- Keep a scratch notebook beside the text and write down assumptions, diagrams, and the points where you usually get stuck.
- Use the course tutor, guided practice, and homework only after you can explain the chapter in your own words.

5 Quiz review and official exam preparation	21
6 Course vocabulary index	23
7 Back-of-book answers and solution outlines	24

Course map

- 4 live lesson chapters
- 4 graded homework checkpoints
- 2 timed quizzes
- 1 cumulative mastery exam
- 4 declared course outcomes

Prerequisite and readiness position

This course is a gateway course in the current Summit sequence.

Semester workload standard

Summit runtime workload label: 6-7 hours each week.

Reference basis

Primary synthesis anchors from the bibliography for this course (50 listed references total):

1. Give Me Liberty!
2. American Government: Stories of a Nation
3. Economics
4. Ways of the World
5. The First U.S. History Textbooks
6. American History Textbooks
7. U.s. History Uncensored
8. Teaching U.S. History Beyond the Textbook

Chapter 1

Chapter 1 Foundations and language

Chapter purpose

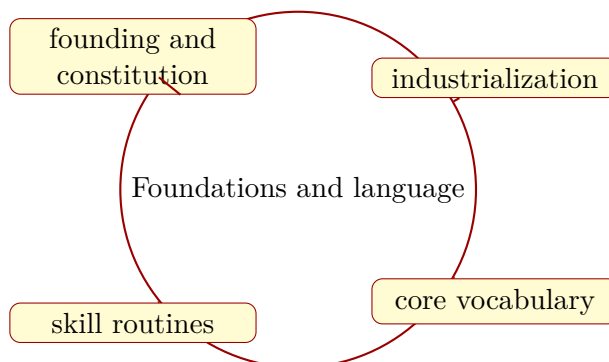

Introduce the baseline language, vocabulary, and structures that students need before United States History can become fluent and flexible.

This chapter sits at the opening of United States History. It develops founding and constitution, industrialization, core vocabulary, and skill routines so that the student can move from explanation to execution without losing the thread of the course.

The reader should use this chapter to build context: who is involved, what changed, what stayed continuous, and why the pattern matters. Good study in this family means connecting evidence to interpretation, not memorizing a list of terms or dates.

Core ideas

- founding and constitution
- industrialization
- core vocabulary
- skill routines

How to think through this chapter

Method begins with sourcing the evidence, locating it in time and place, and then comparing competing interpretations. Students should expect to defend claims with examples, maps, texts, or cases rather than with recall alone.

When working this chapter, keep the following question active: @@TOKEN_0@@ A good student answer should connect setup, assumptions, and conclusion instead of only chasing a final number or sentence.

Introduce the baseline language, vocabulary, and structures that students need before United States History can become fluent and flexible.

Why Foundations and language matters in United States History

Foundations and language is not just another topic block. It is where students learn to organize their thinking so that founding and constitution becomes a deliberate tool instead of a memorized step list.

Summit treats this lesson as applied reasoning: students should be able to say what the model is doing, what assumptions it needs, and why the conclusion would hold up under review.

How strong students move through this material

The strongest approach is to begin with the governing idea, then connect it to the problem setup, and only then carry out the detailed work. In this lesson that usually means centering founding and constitution before letting algebra, computation, or design detail take over.

When industrialization enters the picture, the student should already know what variables, constraints, or interpretations matter. That prevents the work from collapsing into disconnected steps.

What to watch for when the work gets harder

core vocabulary usually separate surface familiarity from real mastery. This is where students need to slow down, keep notation disciplined, and explain why the method choice still fits the problem.

A top-quality solution is not just correct. It is organized, explicit about assumptions, and clear enough that another engineer or instructor could audit the logic without guessing what was meant.

Worked example

@@TOKEN_0@@ Outline a complete united states history approach that uses founding and constitution to reason through industrialization.

1. Start by identifying the governing principle behind founding and constitution and state the assumptions that make it valid in this setting.
2. Define the variables, coordinate choices, constraints, or design criteria that control industrialization.
3. Carry the method through in a disciplined sequence, showing where founding and constitution shapes the setup and intermediate steps.
4. Close with an engineering interpretation that explains what the result means and why the conclusion is reasonable.

Read this example twice: once for the flow of ideas and once for the technical structure of the solution.

Worked-through guided example

@@TOKEN_0@@ Work a united states history problem built around founding and constitution. Explain the setup, the governing method, and the final conclusion you would defend.

1. State why founding and constitution is the controlling idea in this problem.
2. List the variables, assumptions, and governing relationships before trying to solve.
3. Carry the reasoning forward in a clean sequence and end with a technical interpretation.

A complete solution begins from founding and constitution, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

Instructor commentary

Students should annotate this chapter for structure, not just facts. Mark where the argument changes direction, where the method requires a hidden assumption, and where the conclusion becomes more general than the worked example. If the chapter feels easy while you are reading it but difficult when you close the page, you have not yet converted recognition into mastery.

A productive pattern is timeline, map, key actor, evidence set, and short written interpretation.

Practice while you read

Foundations and language guided practice

Introduce the baseline language, vocabulary, and structures that students need before United States History can become fluent and flexible.

@@TOKEN_0@@ Work a united states history problem built around founding and constitution. Explain the setup, the governing method, and the final conclusion you would defend.

- Hint: Return to the key idea founding and constitution and identify what assumptions, variables, or constraints must be fixed before you work forward.
- Step 1: State why founding and constitution is the controlling idea in this problem.
- Step 2: List the variables, assumptions, and governing relationships before trying to solve.
- Step 3: Carry the reasoning forward in a clean sequence and end with a technical interpretation.
- Checkpoint: A strong checkpoint answer identifies founding and constitution, builds a disciplined setup, and defends a final conclusion.

@@TOKEN_0@@ Work a united states history problem built around industrialization. Explain the setup, the governing method, and the final conclusion you would defend.

- Hint: Return to the key idea industrialization and identify what assumptions, variables, or constraints must be fixed before you work forward.
- Step 1: State why industrialization is the controlling idea in this problem.
- Step 2: List the variables, assumptions, and governing relationships before trying to solve.
- Step 3: Carry the reasoning forward in a clean sequence and end with a technical interpretation.
- Checkpoint: A strong checkpoint answer identifies industrialization, builds a disciplined setup, and defends a final conclusion.

Chapter homework

@@TOKEN_0@@ Introduce the baseline language, vocabulary, and structures that students need before United States History can become fluent and flexible.

1. Complete a full united states history problem centered on founding and constitution. State the setup, the governing method, and the engineering conclusion you would defend.
2. Complete a full united states history problem centered on industrialization. State the setup, the governing method, and the engineering conclusion you would defend.
3. Complete a full united states history problem centered on core vocabulary. State the setup, the governing method, and the engineering conclusion you would defend.
4. Complete a full united states history problem centered on skill routines. State the setup, the governing method, and the engineering conclusion you would defend.

Answers for these homework problems appear in the back-of-book answer key.

Chapter summary and study notes

- Explain when founding and constitution is the right tool and when it is not.
- Carry a full solution or analysis from setup to conclusion without skipping assumptions.
- Use notation, units, and technical language clearly enough for formal grading.

Study tips

- Name the governing idea first: founding and constitution.
- Write down assumptions and constraints before pushing through calculations or design choices.
- End every serious solution with a technical interpretation, not only a final number or label.

Common traps

- Jumping into symbol manipulation before the governing model is clear.
- Treating the procedure like a script instead of checking whether the assumptions still hold.
- Stopping at the answer line without explaining what the result means in context.

Family-level errors to watch for

- Reducing a chapter to isolated names or dates without context.
- Confusing summary with interpretation.
- Ignoring the evidence base behind a historical, civic, or social claim.

Chapter 2

Chapter 2 Reasoning and structure

Chapter purpose

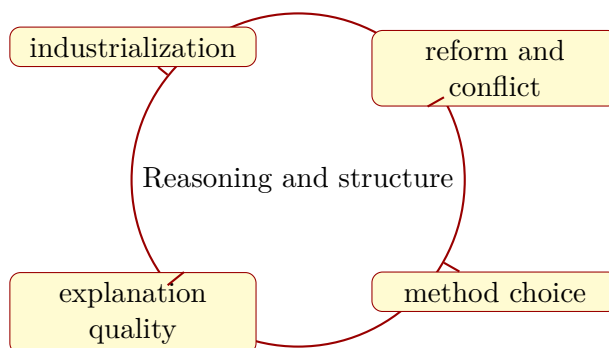

Move beyond vocabulary into the deeper patterns, methods, and reasoning moves that organize United States History.

This chapter sits in the middle of United States History. It develops industrialization, reform and conflict, method choice, and explanation quality so that the student can move from explanation to execution without losing the thread of the course.

The reader should use this chapter to build context: who is involved, what changed, what stayed continuous, and why the pattern matters. Good study in this family means connecting evidence to interpretation, not memorizing a list of terms or dates.

Core ideas

- industrialization
- reform and conflict
- method choice
- explanation quality

How to think through this chapter

Method begins with sourcing the evidence, locating it in time and place, and then comparing competing interpretations. Students should expect to defend claims with examples, maps, texts, or cases rather than with recall alone.

When working this chapter, keep the following question active: @@TOKEN_0@@ A good student answer should connect setup, assumptions, and conclusion instead of only chasing a final number or sentence.

Move beyond vocabulary into the deeper patterns, methods, and reasoning moves that organize United States History.

Why Reasoning and structure matters in United States History

Reasoning and structure is not just another topic block. It is where students learn to organize their thinking so that industrialization becomes a deliberate tool instead of a memorized step list.

Summit treats this lesson as applied reasoning: students should be able to say what the model is doing, what assumptions it needs, and why the conclusion would hold up under review.

How strong students move through this material

The strongest approach is to begin with the governing idea, then connect it to the problem setup, and only then carry out the detailed work. In this lesson that usually means centering industrialization before letting algebra, computation, or design detail take over.

When reform and conflict enters the picture, the student should already know what variables, constraints, or interpretations matter. That prevents the work from collapsing into disconnected steps.

What to watch for when the work gets harder

method choice usually separate surface familiarity from real mastery. This is where students need to slow down, keep notation disciplined, and explain why the method choice still fits the problem.

A top-quality solution is not just correct. It is organized, explicit about assumptions, and clear enough that another engineer or instructor could audit the logic without guessing what was meant.

Worked example

@@TOKEN_0@@ Outline a complete united states history approach that uses industrialization to reason through reform and conflict.

1. Start by identifying the governing principle behind industrialization and state the assumptions that make it valid in this setting.
2. Define the variables, coordinate choices, constraints, or design criteria that control reform and conflict.
3. Carry the method through in a disciplined sequence, showing where industrialization shapes the setup and intermediate steps.
4. Close with an engineering interpretation that explains what the result means and why the conclusion is reasonable.

Read this example twice: once for the flow of ideas and once for the technical structure of the solution.

4. Complete a full united states history problem centered on mastery exam. State the setup, the governing method, and the engineering conclusion you would defend.

Answers for these homework problems appear in the back-of-book answer key.

Chapter summary and study notes

- Explain when review is the right tool and when it is not.
- Carry a full solution or analysis from setup to conclusion without skipping assumptions.
- Use notation, units, and technical language clearly enough for formal grading.

Study tips

- Name the governing idea first: review.
- Write down assumptions and constraints before pushing through calculations or design choices.
- End every serious solution with a technical interpretation, not only a final number or label.

Common traps

- Jumping into symbol manipulation before the governing model is clear.
- Treating the procedure like a script instead of checking whether the assumptions still hold.
- Stopping at the answer line without explaining what the result means in context.

Family-level errors to watch for

- Reducing a chapter to isolated names or dates without context.
- Confusing summary with interpretation.
- Ignoring the evidence base behind a historical, civic, or social claim.

Chapter 5

Quiz review and official exam preparation

Homework structure

- Homework Set 1: Foundations and language: 4 graded problems attached to chapter 1.
- Homework Set 2: Reasoning and structure: 4 graded problems attached to chapter 2.
- Homework Set 3: Application and communication: 4 graded problems attached to chapter 3.
- Homework Set 4: Cumulative mastery: 4 graded problems attached to chapter 4.

Quiz structure

- Quiz 1: Foundations and language and Reasoning and structure: 4 questions, timed, and single-attempt in the live course. Quiz 1 should be taken only after you can solve the chapter homework without outside prompts.
- Quiz 2: Application and communication and Cumulative mastery: 4 questions, timed, and single-attempt in the live course. Quiz 2 should be taken only after you can solve the chapter homework without outside prompts.

Official mastery exam

- United States History cumulative mastery exam: 5 major questions, High rigor, first official attempt locks the course grade.

United States History cumulative mastery exam preparation checklist

- Review every lesson in United States History and be able to explain why each method is used, not only how it is executed.

- Practice complete written solutions, because Summit grades setup quality, assumptions, and interpretation directly.
- Use the guided practice and quizzes until you can explain the method flow without outside prompts.
- Expect the official exam to combine method choice, disciplined setup, and a defended conclusion in the same answer.

How to use this book before assessment

- Read the relevant chapter and rebuild both worked examples without looking.
- Solve the guided practice in the chapter before attempting the graded homework.
- Check your chapter-homework answers only after you complete a full written attempt.
- Review the quiz answer key after each chapter block and classify your errors by concept, setup, algebra, or interpretation.
- Before the official exam, revisit the chapter purposes, homework corrections, and answer-key notes rather than rereading formulas only.

- Checkpoint answer: A strong checkpoint answer identifies industrialization, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from industrialization, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around reform and conflict. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies reform and conflict, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from reform and conflict, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around method choice. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies method choice, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from method choice, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

Chapter 3: Application and communication

@@TOKEN_0@@

1. Work a united states history problem built around reform and conflict. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies reform and conflict, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from reform and conflict, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around modern america. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies modern america, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from modern america, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around application. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies application, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from application, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

Chapter 4: Cumulative mastery

@@TOKEN_0@@

1. Work a united states history problem built around review. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies review, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from review, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around synthesis. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies synthesis, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from synthesis, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

1. Work a united states history problem built around mixed practice. Explain the setup, the governing method, and the final conclusion you would defend.

- Checkpoint answer: A strong checkpoint answer identifies mixed practice, builds a disciplined setup, and defends a final conclusion. - Solution note: A complete solution begins from mixed practice, applies the correct course method, and closes with a written interpretation that explains why the result is reasonable.

Homework answer key

Homework Set 1: Foundations and language

1. Complete a full united states history problem centered on founding and constitution. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for founding and constitution, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on industrialization. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for industrialization, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on core vocabulary. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for core vocabulary, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on skill routines. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for skill routines, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

Homework Set 2: Reasoning and structure

1. Complete a full united states history problem centered on industrialization. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for industrialization, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on reform and conflict. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for reform and conflict, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on method choice. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for method choice, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on explanation quality. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for explanation quality, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

Homework Set 3: Application and communication

1. Complete a full united states history problem centered on reform and conflict. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for reform and conflict, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on modern america. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for modern america, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on application. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for application, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on communication. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for communication, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

Homework Set 4: Cumulative mastery

1. Complete a full united states history problem centered on review. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for review, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on synthesis. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for synthesis, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on mixed practice. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for mixed practice, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

1. Complete a full united states history problem centered on mastery exam. State the setup, the governing method, and the engineering conclusion you would defend.

- Answer / solution summary: A strong answer identifies the governing model for mastery exam, states assumptions explicitly, works through the key analytical steps, and closes with a technically defensible conclusion tied to the scenario.

Quiz answer key

Quiz 1: Foundations and language and Reasoning and structure

1. Which topic is a direct priority inside Foundations and language?

- Answer key: founding and constitution. founding and constitution is named directly in the Foundations and language study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Foundations and language?

- Answer key: industrialization. industrialization is named directly in the Foundations and language study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Reasoning and structure?

- Answer key: industrialization. industrialization is named directly in the Reasoning and structure study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Reasoning and structure?

- Answer key: reform and conflict. reform and conflict is named directly in the Reasoning and structure study block and is one of the required ideas for mastery in this course.

Quiz 2: Application and communication and Cumulative mastery

1. Which topic is a direct priority inside Application and communication?

- Answer key: reform and conflict. reform and conflict is named directly in the Application and communication study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Application and communication?

- Answer key: modern america. modern america is named directly in the Application and communication study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Cumulative mastery?

- Answer key: review. review is named directly in the Cumulative mastery study block and is one of the required ideas for mastery in this course.

1. Which topic is a direct priority inside Cumulative mastery?

- Answer key: synthesis. synthesis is named directly in the Cumulative mastery study block and is one of the required ideas for mastery in this course.

Mastery exam solution outlines

United States History cumulative mastery exam

1. Explain how founding and constitution is used inside United States History to analyze or design around industrialization. Give the method, the assumptions that matter, and the conclusion you would stand behind.

- What to show: The governing principle behind founding and constitution; A disciplined setup for industrialization; A clear engineering conclusion - Solution outline: A strong solution identifies the governing principle for founding and constitution before jumping into algebra, computation, or design detail. The work should connect founding and constitution to industrialization with explicit assumptions, a defensible setup, and a technically clear conclusion.

1. Explain how industrialization is used inside United States History to analyze or design around reform and conflict. Give the method, the assumptions that matter, and the conclusion you would stand behind.

- What to show: The governing principle behind industrialization; A disciplined setup for reform and conflict; A clear engineering conclusion - Solution outline: A strong solution identifies the governing principle for industrialization before jumping into algebra, computation, or design detail. The work should connect industrialization to reform and conflict with explicit assumptions, a defensible setup, and a technically clear conclusion.

1. Explain how reform and conflict is used inside United States History to analyze or design around modern america. Give the method, the assumptions that matter, and the conclusion you would stand behind.

- What to show: The governing principle behind reform and conflict; A disciplined setup for modern america; A clear engineering conclusion - Solution outline: A strong solution identifies the governing principle for reform and conflict before jumping into algebra, computation, or design detail. The work should connect reform and conflict to modern america with explicit assumptions, a defensible setup, and a technically clear conclusion.

1. Explain how review is used inside United States History to analyze or design around synthesis. Give the method, the assumptions that matter, and the conclusion you would stand behind.

- What to show: The governing principle behind review; A disciplined setup for synthesis; A clear engineering conclusion - Solution outline: A strong solution identifies the governing principle for review before jumping into algebra, computation, or design detail. The work should connect review to synthesis with explicit assumptions, a defensible setup, and a technically clear conclusion.

1. Write a cumulative response that shows how a student in United States History should move from problem statement to defended result. Use the course outcomes to explain what high-quality work looks like.

- What to show: A staged engineering workflow; The assumptions or modeling choices that control the result; A defended final interpretation - Solution outline: A strong answer reflects the course outcome "Demonstrate control over founding and constitution and industrialization inside United States History." and explains how disciplined setup, method choice, and interpretation fit together. The response should describe a full workflow, not isolated vocabulary words.
